Technical design
& innovation

Local enterprise
development

Training

Research,
consultancy &
advice

Increasing access to farmer-led irrigation

- Promoting accessible irrigation solutions and decision making tools
- Tailor made technical and financial trainings
- **IRRIS** app for solar irrigation design
- **Zainer**, a tool to mechanise Zai

Professionalizing the groundwater sector with innovative technology

- **Volterra** electrical resistivity device for borehole siting
- Digital **Driller's toolbox** to simplify data collection: geophysics, drill logs, pump tests, siting

Innovating to optimize business cases for rural water supply

- Modular piped water systems design
- **Asset management** tools for planning & monitoring water systems
- **TokenTap** device for pre-paid water supply

Developing sustainable faecal sludge management chains

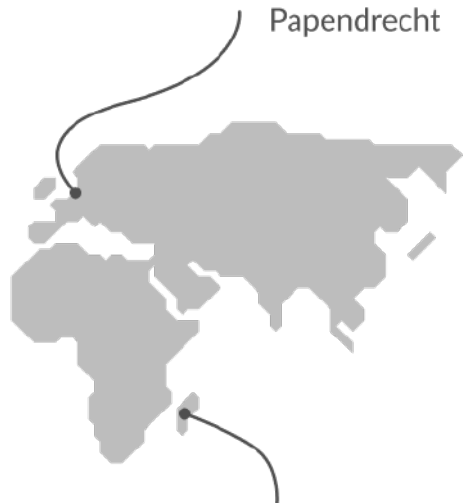

- Innovative management models for sanitation services
- **Pupu** desludging pump for densely populated areas
- Adapted faecal sludge treatment plants

PRACTICA is a non-profit technical advisory organisation with the mission to strengthen skills and tools in low and middle-income countries. We develop and promote affordable technologies with a high potential to improve livelihoods.

Our priority is to integrate technical innovations into business models to ensure sustainable access to water, irrigation and sanitation.

Netherlands office
Papendrecht

Madagascar office
Antananarivo

Since 2001, we have gained experience and shared knowledge in over 25 countries in Sub-Saharan Africa and South Asia.

Our team is composed of staff members and consultants working from our offices in the Netherlands and Madagascar or from project locations in a range of countries in Africa.
